Rafael Correa – Ecuador Today – covering Some New Left Review and Philological Styles from Sirohi

By Rafael Correa

I. Greece – a slave society which has commerce – today a criminalized Ecuador and some Leftist victory which then goes to a orchard parable of vineyards and cover spurious alcoholism or Marijuana trade as Ignacio Martin Baro argues – from Sirohi – just this is enough for us

In fact then I get the picture – a dependent and backward Ecuador with criminals and lumpen development bourgeoisie also in the opposition and in my apparatchik backward party organisers perhaps and the poorest black and indigenous people as struggling.

That was the Pink Tide then, and I reject this process of ethnic politics with modern class merged.

II. My Perspective on “Knowing Oneself and Knowing the Other”

In fact if you know Rafael Correa he loves the New Left Review style of working, loved the perspective style of working and that is my plan after the Pink Tide failure – and we can tell it is that perspective I am working on – so far development model and social struggle model merged as in fact Linera today which means also in fact Trotskyism today which becomes in fact for me Ecuador Today – a progressive politics based on mobilizing the masses for in fact modernism – which is because of a philological exercise called Greece and slave politics winning with Sirohi, the Prophetic new Trotsky figure online – thank you.
